REMARKS

This application is a continuation of U.S. Serial No. 10/011,377, filed October 22, 2001, now allowed, which is a continuation of U.S. Serial No. 08/985,734, filed December 5, 1997, now U.S. Patent No. 6,576,659, issued June 10, 2003, which claims priority of U.S. Provisional Application Serial No. 60/032,414, filed December 5, 1996. An Issue Fee was paid in connection with U.S. Serial No. 10/011,377, on February 27, 2004. Accordingly the parent application, U.S. Serial No. 10/011,377, is pending and has not issued as a patent and the subject continuation application is co-pending therewith in fulfillment of the provisions of 35 U.S.C. §120.

By this Preliminary Amendment, applicant has amended the specification to incorporate a reference to the parent application, U.S. Serial No. 10/011,377, filed October 22, 2001, in accordance with 35 U.S.C. §120. Applicants have also canceled claims 3-15 and 17-29 without prejudice to applicants' right to pursue the subject matter of these claims in this or a subsequent application thereby to reduce the filing fee. Accordingly claims 1, 2 and 16 are pending in the subject application.
